THIS IS UNEVALUATED INFORMATION

SOURCE Moskovskiy Bol'shevik. (Information requested.)CARELESSNESS IN "MOSELEMENT" PLANT SCORED

In Shop No 2 of the "Moselement" Plant, some workers are contaminating KB elements [for electrolytic glass jar type batteries] by failing to use the necessary tyul'panchik [glass cover?]. By not using the cover, they are able to speed up their work and put out several tens of elements above their quota, but the production turned out by them proves to be worthless, because the absence of the glass cover causes the self-discharge of the elements. The output of such elements certainly does not give credit to the plant.
